

Please do not allow the Consumer Bankers Association (CBA) to be able to call me at home. Some of the more rude calls that I have received were from banks trying to get me open another credit card.

I work at lot of overtime. I need to be able to relax at home. I have received calls at 10Pm until I was able to go on Indiana's no call list. One day I had a call from a credit card company that I had previously done business. They had called me 15 times with a computer. Please do not change Indiana's no call list! Calling someone at home is not a good way to do business. You can tell them, I will never get a credit card over the phone. Thank you for time.
